

Welcome to the RunsWktsOvers channel where tonight we will be demonstrating how to operate Duckworth Lewis Stern (DLS) within the Play Cricket Scorer Professional (PCS Pro) software.

DLS is a method of re-calculating the target score for the team batting second in a limited overs cricket match that has been interrupted for some reason. Interruptions are usually due to inclement weather but can be for a variety of non-weather related reasons too.

Whilst there is independent software to help with this re-calculation, the same method and mathematical formulae have been embedded into the PCS Pro software that is available to download free-of-charge from the Play Cricket website (<http://play-cricket.com/updates3>). This live demonstration (in under an hour) will walk you through how to operate DLS from within PCS Pro, re-calculating target scores and producing Par Score tables.

If you want to join in and follow the demonstration on your own laptop, please ensure that you have PCS Pro installed (download from the link above). The demonstration will start with a game that is already in progress and has been scored up to the point that it started raining.

The game has been exported from PCS Pro at this point and can be downloaded from <https://bit.ly/3bwmH8y>. To join in the live demonstration, please import the match into PCS Pro as follows:- 1. Download the exported PCS Pro file (with the extension .cri) from the link above. 2.

Open PCS Pro on your laptop (no need to login), click on the File menu, then on Import Match(es). 3. Click on the Browse button (top right), navigate to the folder where you stored the downloaded “.cri” file and click on OK to close the Browse window. 4. Select the downloaded in the main Import window and then click on the Import button (bottom right). 5. If asked to confirm that the match was exported from PCS Pro (ECB full version) – click on Yes. 6. When you see the Import Complete message, click on Open Match Now. The match will open with Notchers at 167/9 off 18.5 overs in the first innings of a T20 match. 7.

Don't score anything else in this match until the demonstration starts. You can close PCS Pro with the match still open and re-open it later with the match at the same point. If you want a handout to refer back to how DLS works within PCS Pro as a reminder once the demonstration has finished, please click on <https://bit.ly/2VxS3Gc>
