

Welcome to the RunsWktsOvers channel where tonight we will be using Play Cricket Scorer Professional (PCS Pro) in an hour's session dedicated to editing techniques and tips. It is hard to concentrate for such a long time, so scoring mistakes are inevitable (not all of them caused by the scorers) and knowing how to rectify things quickly is important. Join us tonight where we will be starting with a game that is already in progress and learning how to correct some common types of errors.

The game can be downloaded from the link below and imported into PCS Pro using the following instructions. This is the same match that we used in the DLS session on the 29th April. If you still have the match from that date, omit step one below. Download the exported PCS Pro file (with the extension .cri) from the link below.

Open PCS Pro on your laptop (no need to login), click on the File menu, then on Import Match(es). Click on the Browse button (top right), navigate to the folder where you stored the downloaded ".cri" file and click on OK to close the Browse window. Select the downloaded in the main Import window and then click on the Import button (bottom right). If warned that you already have a local copy of this match, click on Continue to overwrite your current version of this match. If asked to confirm that the match was exported from PCS Pro (ECB full version) – click on Yes.

When you see the Import Complete message, click on Open Match Now. The match will open with Notchers at 167/9 off 18.5 overs in the first innings of a T20 match. Don't score anything else in this match until the demonstration starts.

You can close PCS Pro with the match still open and re-open it later with the match at the same point. Download the partly scored match from <https://bit.ly/2z2xvgk> PCS Pro is available to download free-of-charge from the Play Cricket website <http://play-cricket.com/updates3> but note we are not learning to use this software from scratch tonight. Download a handout to remind you about the editing techniques from <https://bit.ly/2zTDmol>
