

Welcome to the RunsWktsOvers channel where tonight we will be looking at the new features and main scoring changes in version 3.0.4.2 of Play Cricket Scorer Professional (PCS Pro) that was released on 7th May 2020. In the 2019 UK cricket season PCS Pro version 2.1 was in operation and there are some great new features in version 3 that you might not be aware of.

Join us tonight where we will be starting with a brand new match between the Scratchers and the Notchers. You can either create your own local match between any two teams, to follow the live demo with or download the Scratchers v Notchers game from the link at the bottom of this information and import it in PCS Pro using the following instructions. Download the exported PCS Pro file (with the extension .cri) from the link below.

Open PCS Pro on your laptop (no need to login), click on the File menu, then on Import Match(es). Click on the Browse button (top right), navigate to the folder where you stored the downloaded “.cri” file and click on OK to close the Browse window. Select the downloaded match in the main Import window, then click on the Import button (bottom right).

Click on Yes to confirm that the match was exported from PCS Pro (ECB full version). When you see the Import Complete message, click on Open Match Now. The T20 match is at the set-up stage waiting for you to confirm the match players and record the toss. Don't score anything in this match until the demonstration starts. You can close PCS Pro with the match still open and re-open it later with the match at the same point. PCS Pro is available to download free-of-charge from the Play Cricket website <http://play-cricket.com/updates3> but note we are not learning to use this software from scratch tonight. Download the demonstration match from <https://bit.ly/3cl8dZI> Download a handout to remind you about new features in PCS Pro v3.0.4.2 from <https://bit.ly/3dxM1vo>
