

This session is all about the result in cricket.

You have scored the match; you know how many runs each team has accrued but do you know the result of match and what to do with it?

There is a tight finish and either side could still win. Will you know the exact moment when the game has finished - what counts and what doesn't?

Match regulations state that in the event of a tie, the result will be decided on a Super Over. How are you going to score that Super Over? Will you be ready when the players take the field?

There won't be much scoring done in this session, but we will be using PCS Pro to end a match. If you want to follow that process, please download the match below and import it into Play Cricket Scorer Professional, ready to use at the right time.

Download the partly scored match for Play Cricket Scorer Professional from <https://bit.ly/2Ymy92E>.
